

Defense

Readiness Index

Make people the strongest part of your cyber defense line.

RangeForce enables cybersecurity leaders to measure the readiness, skills, and engagement of their teams so they can best prepare against emerging threats.

The Defense Readiness Index gives organizations an outlook on threat actors most relevant to them. Team progress is calculated around specific threats and situations, providing focus and insight into the most valuable areas.

Organizational
current level

DRI 2

Threat-Centric Reporting ⓘ

Your team's readiness against potential threats and areas of improvement.

This month: March 2022

The RangeForce Approach

- Empower humans against threats
- Assess defensive posture constantly
- Develop a readiness plan
- Validate skills with team exercises

Program Features

Defense Readiness Index (DRI)

- Understand and track changes in your defensive posture
- Focus on threat actors most relevant to your organization
- Present progress with advanced reporting tools

Threat-Centric Reporting

- Hone readiness against new and common threats
- Measure strengths and skill gaps for each team member
- Gain peace of mind about your team's ability to handle threats

Team Threat Exercises

- Test your teams' abilities to stand against real threats
- Study team results with post-exercise summaries
- Scale exercises to meet your team's specific needs

Skills & Upskilling

- Locate skill gaps across teams
- Identify top candidates and confirm job readiness
- Track both team and individual progress
