

SecHQ

Personalized content recommendations for targeted skills development

SecHQ Overview

RangeForce SecHQ provides personalized, relevant content recommendations based on the user's specific needs for skills development. With SecHQ, users get a targeted experience within the extensive RangeForce content library, including a new section showcasing leading security vendors and systems.

Users have the ability to choose the skills and topics that matter most to them, ensuring skill development is targeted and efficient. Easy access to vendor-specific modules empowers users to improve their capabilities on popular third-party cybersecurity tools and solutions, operating systems, and more.

Benefits

-  Target the skills that matter most to your company and career
-  Personalize your experience and explore new skills
-  Find relevant content faster

Popular Topics

- Threat analysis and response
- Vulnerability testing and exploitation
- Secure coding
- Systems and infrastructure security, including cloud platforms
- Cybersecurity foundations
- Operational readiness

Get Started:

1. Select an area of interest
2. Set up goals to track progress
3. Start a course from the recommendations list, or explore technologies
